Post-Doctoral Position

Where: In the laboratory group led by Dr. Jeffrey Isenberg in the Vascular Medicine Institute (http://www.vmi.pitt.edu/) and the Division of Pulmonary, Allergy, and Critical Care Medicine at the University of Pittsburgh School of Medicine, Pittsburgh, PA.

Research focus: A Post-Doctoral position is immediately available in our NIH and industry funded research laboratory investigating the role of the matricellular signaling in controlling cell/tissue responses to injury and healing. The PI’s laboratory is within the Vascular Medicine Institute of the University of Pittsburgh, a premier center of cardiovascular research. The lab conducts cutting edge basic and translation science research with ongoing regional, national and international collaborations.

Requisites: • PhD in Biochemistry, Cell Biology, Pharmacology, or equivalent. • Highly motivated person with a particular interest in Cell and Molecular Biology, ligand-receptor interactions, cell matrix cross-talk with scientific ambition and teamwork skills. • Background of research in Cell and Molecular Biology, and isolated cell and animal models of injury/disease. • Fluent spoken and written English. • Preference will be given to the applicant with evidence of scientific productivity, a strong publication record, the ability to handle several projects concurrently and a commitment to developing an independent research program.

Start Date: • Fall/Winter 2016

Please forward a curriculum vitae, a cover letter detailing research and career goals, and 3 letters of reference with contact information for the same to: Ms. Carla Monzo, email: monzocm@upmc.edu for an appointment.

Dr. Isenberg’s group information can be found at: http://www.vmi.pitt.edu/labs/isenberglab.html
